TOOTH OR CONSEQUENCES

PREVENTATIVE PATIENT CARE

One of the most important aspects of oral health is the attention paid to preventative patient care. This care begins during your initial examination and hygiene protocol. Once you have completed the hygiene procedures and our hygienist has discussed (along with the doctor) the condition of your mouth, you will be instructed concerning your hygiene plan. This appointment is not just a cleaning, your hygiene visit is a valuable preventive measure to reduce tooth decay and periodontal disease.

With that in mind, the plan will be based on the assessment of your professional team, the doctor and hygienist. It is a commitment for you to follow through with the instructions and feedback to make a continuing care system successful. The MDG team is here to ensuring you receive regular, preventative dental treatments as an essential the source of oral health. We share in the responsibility for your oral health and always look forward to seeing positive results.

Office hours are Monday to Friday: 9:00am – 5:00pm

Saturday: 9:00am – 2:00pm

Hygienist Hours on Monday, Friday and Saturday

Emergency visits scheduled off normal business hours
